

## **COMMERCIAL RELOCATION DIVISION**

### **GUIDE TO YOUR OFFICE RELOCATION**

#### **Staff**

Please ensure that you have adequate staff attendance at the collection address, as it is your responsibility to ensure that all items to be removed are taken. It is also helpful to have members of your staff in attendance at the new premises to ensure that furniture and effects are placed in the correct location.

#### **Crates**

Allen Removals will deliver and distribute all plastic crates required for a self pack of files and effects. Place the contents of all desks and cupboards into the crates and pull down the two finger locking lids on each side. Please do not fill crates higher than the lids and stack packed crates no more than four high.

Any crates not returned after the removal or broken will be invoiced for at EURO 75.00 each subject to VAT @ 21%

#### **Labels**

Please ensure that every crate is clearly labeled describing the contents and the destination at your new premises. Sticky mailing labels can be used.

#### **Layout**

Please supply a sketch or floor plan of each room at the new location, indicating room number and the position of each item. If we are unable to comply with your plan due to insufficient space, our staff will place items in practical alternative positions.

#### **Lifts**

We will require exclusive use of lifts at both collection and delivery premises in order that the removal may be carried out as speedily as possible. IF THE LIFT IS NOT WORKING OR AVAILABLE PLEASE ADVISE AS SOON AS POSSIBLE. YOUR QUOTATION AND OFFICE REMOVAL PLAN WILL HAVE TO BE REVISED.

#### **Drawing Boards**

Side wired and weights must be secured in order to prevent movement in transit. Ensure that all accessories are removed and packed into crates.

#### **Fireproof Cabinets**

These may be moved loaded if they are going ground floor to ground floor with no steps.

#### **Safes**

Contents must be packed into crates. Alternative arrangements must be made for the transportation of cash, deeds, bonds, securities, etc. All safes must be left open and keys available. Please ensure that the floor loading capacity at the new premises is sufficient to accommodate the safe.

#### **Computer and Electronic Equipment**

Computers, hard drives, printers, keyboards, word processors, main-frame units, peripheral and general office equipment should be disconnected and made ready for packing and moving by Allen Removals staff.

Please note that the internal software of computers or electronic equipment cannot be covered by insurance.

#### **Photocopiers**

Check with the manufacturer or supplier before moving any photocopiers. Most photocopiers should be drained of any fluid prior to removal. Larger machines must be dismantled and prepared for removal by the equipment engineers.

#### **Dismantling / Reassembly**

Allen Removals employees will dismantle and re-assemble free standing racking, shelving, modular/system workstations, boardroom tables, drawing equipment etc. WHERE AGREED.

## **COMMERCIAL RELOCATION DIVISION**

### **GUIDE TO YOUR OFFICE RELOCATION**

#### **Flat Packed Furniture**

This can be difficult! In theory you are supposed to be able to dismantle and re-assemble most flat packed furniture. In practice, it never goes together again so well and can't be covered by insurance. You can move it complete but joints may loosen.

#### **Plants**

Our staff will move plants at your request, although we are unable to accept responsibility for any damage or deterioration. Plants supplied on a rental basis must be removed by the supplier.

#### **Parking**

We will ensure adequate and appropriate arrangements with relevant authorities for suitable parking in close proximity to your premises. In order to facilitate parking on yellow lines, "red routes", chevrons, urban clearways, etc we will apply for parking permits in advance of the removal. WHERE AGREED.

#### **Desks**

If electrical appliance or telephones are cabled through desks, please unplug them and pack them into crates. Do not lock drawers or leave keys in locks.

#### **Bookcases**

Contents must be packed into crates. Please label sliding glass doors separately, as these will be taken out prior to the removal. Please do not leave keys in locks.

#### **Metal Filing Cabinets**

The contents of metal filing cabinets do not necessarily have to be emptied (unless they are to be carried up/down stairs/steps). Keep the key in a safe place. We will not be responsible for cabinet keys.

#### **Wooden Filing Cabinets**

Please empty all contents of wooden filing cabinets into crates. Lock the cabinet, and keep the key in a safe place. We will not be responsible for cabinet keys.

#### **Lateral Filing Cabinets**

Please empty all contents of lateral filing cabinets into crates. Lock the cabinet and keep the key in a safe place. We will not be responsible for cabinet keys.

#### **Plan Chests**

Normally plan chests may be left loaded. If the chest comprises two or more sections, please ensure that the top drawer of each section is emptied prior to removal.

#### **Personal Items**

We suggest that your employees remove personal items from the premises whilst the removal is in progress.
